DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Jonathan Berschadsky. on February 17, 2009.

Claims 1-21 are canceled.

Allowable Subject Matter

Claims 22, 24-25, 31 and 56-72 are allowed over the prior art record.

The following is an examiner's statement of reasons for allowance:

3. The closest prior art of record

Walker et al. (US Patent 6,163,771). A device for facilitating financial account transactions is described which includes a processing unit including a cryptographic processor.
-
- i. What they fail to teach or suggest:

one of the art of record, taken individually or combination disclose at least the steps/components of “transmitting, by the at least one the remote server and the smart card, the transaction number to the second party; and auto-filling, by the second party, the transaction number into the transaction authorization request; identifying, via the host computer, the primary account of the first party based, at least in part, on the transaction number; authorizing, via the host computer, the transaction authorization request based, at least in part, on the primary account of the first party; and returning, an approval message from the host computer to the second party, when the transaction authorization request is authorized, number are satisfied.”

- ii. These distinct features render claims 22 allowable.
- iii. Claims 24-25, 31 and 56-72 are either dependant upon claim 22 or contain similar limitations and are allowable for at least the same reasons.
- iv. Even if the features missing from the above cited prior art were found in a reasonable number of references a person of ordinary skill in the art at the time of the invention would not have been motivated to combine these reference because the claimed feature of “auto-filling, by the second party, the transaction number into the transaction authorization request” is not a feature normally associated with facilitating a transaction and therefore would have to be disclosed by art unrelated to facilitating a transaction .
